What this standard covers

This standard specifies the lightweight rigid foam material terms and definitions, classification, specifications and dimensions tolerance, technical requirements, test methods, inspection rules, and signs, packaging, transportation and storage requirements. This standard applies to highway engineering field and factory foam lightweight rigid foam material. Waterway, railway, water conservancy, construction, environmental protection and agriculture engineering lightweight rigid foam material can be implemented by reference.

Document data

International classification (ICS): 93.080.10.

Chinese classification (CCS): P66.

Estimated length of the Chinese original: 8,895 words.
