What this standard covers

This standard specifies the system-specific lateral force coefficient of friction test tire specifications, dimensions and tolerances, working conditions, technical requirements and test methods, inspection rules and signs, packaging, transportation, storage and shelf life. This standard applies to working principle, structure and technical parameters identical with BS 7941-1 provides system-specific lateral force coefficient of friction test tire production, use and inspection.

Document data

International classification (ICS): 83.160.10; 93.080.99.

Chinese classification (CCS): G41.

Estimated length of the Chinese original: 9,924 words.
