What this standard covers

This standard specifies the basalt fiber unidirectional cloth specifications, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage requirements. This standard applies to basalt fiber roving as the main raw material, through only with the longitudinal direction along the basalt fiber rovings after laying parallel bonding (stitched) made of basalt fiber unidirectional fabric is mainly used in highway engineering structural reinforcement, reinforcement. Other uses of basalt fiber unidirectional cloth can refer to the use.

Document data

International classification (ICS): 93.080.20.

Chinese classification (CCS): P66.

Estimated length of the Chinese original: 10,142 words.
