What this standard covers

This standard specifies the basalt fiber geogrid models, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage requirements. This standard applies to basalt fiber roving as the main raw material, through weaving and finishing geogrid made of basalt fiber, mainly used to enhance the pavement crack resistance and durability. Other uses of basalt fiber geogrids can be used.

Document data

International classification (ICS): 93.080.20.

Chinese classification (CCS): P66.

Estimated length of the Chinese original: 14,188 words.
