What this standard covers

This standard specifies the general requirements for multi-beam bathymetric system measurement, as well as system configuration, pre-measurement preparation, field measurement, data processing, technical summary, inspection and acceptance, and data submission. This standard applies to full-coverage water depth measurement and underwater obstacle detection for ports, waterways and other waters by multi-beam bathymetric systems with a sounding range of less than 600 m.

Document data

Chinese classification (CCS): R61.

Estimated length of the Chinese original: 27,265 words.
