What this standard covers

This standard specifies the classification, composition, technical requirements, test methods, quality assurance, inspection rules, safety, occupational health and environmental protection, as well as marking and accompanying documentation, packaging, transportation and storage requirements for water-based coatings and their supporting systems for general-purpose containers. This part applies to the production, inspection and use of water-based coatings and their supporting systems for general-purpose containers. Other types of containers should refer to this standard.

Document data

International classification (ICS): 55.180.10.

Chinese classification (CCS): A85.

Estimated length of the Chinese original: 45,467 words.

Supersedes the earlier edition JT/T 712-2008.
