What this standard covers

This standard specifies the concrete surface with a long bridge structure solvent-based coatings for corrosion protection classification and grading, requirements, test methods, inspection rules, marking, packaging and storage of content. This standard applies to the surface of the concrete bridge structure with long-lasting solvent-corrosion coatings, mainly for construction and maintenance areas or air at atmospheric conditions when alternating wet and dry areas of the concrete structure surface protection and decoration. This section does not apply to flexible coatings.

Document data

International classification (ICS): 93.040; 87.040.

Chinese classification (CCS): P28.

Estimated length of the Chinese original: 13,196 words.
