What this standard covers

This standard specifies the classification, structure and model, technical requirements, test methods, inspection rules, and requirements for marking, packaging, transportation and storage of polymer material slide plates used in bridge supports. This standard applies to highway bridge slab bearings, basin bearings, spherical bearings, and polymer material slide plates for bridge bearings with shock-absorbing and isolation functions. It is used as a reference for other building structure engineering.

Document data

Chinese classification (CCS): P28.

Estimated length of the Chinese original: 28,259 words.
