JTS

INDUSTRY STANDARD OF THE PEOPLE'S REPUBLIC OF CHINA

JTS 166-2020

Replacing JTJ 212-2006

Standard for General Design of River Ports

河港总体设计规范

(English Translation)

Issued on: May 29, 2020 **Implemented on: August 1, 2020**

Issued by: Ministry of Transport

Table of Contents

[Preview only]
1 General Provisions
2 Terms
3 Basic Requirements
3.1 General Requirements
3.2 Seismic Precaution Classification and Precautionary Criterion
3.3 Actions and Action Effect Combination
4 Self- Weight
4.2 Liquefiable Soil Foundation
4.3 Hydrology and Silt
4.4 Weather
4.5 Other Influencing Factors
4.6 Mixing Water
4.7 Admixtures
5 Storage Load and Crowd Load
5.2 Crowd Load
5.3 Seismic Earth Pressure
5.4 Earthquake Hydrodynamic Pressure
5.5 Foundation Bearing Capacity and Bank Stability
5.6 Structure Check
6 Hoisting Machinery Load
6.2 Characteristic Value of Load
6.3 High-piled Dolphin Wharf
6.4 Sheet Pile Wharf
6.5 Sloping Wharf and Floating Wharf
6.6 Breakwater
6.7 Navigation Lock
6.8 Wharf Equipment and Auxiliary Facilities
7 Train Load
7.2 Plane Layout and Dimension Design of Dredging Area
7.3 Dredging Modes
7.4 Calculation of Dredging Quantities

7.5 Capital Dredging
7.6 Maintenance Dredging
7.7 Dredging of Polluted Soil
7.8 Rock Dredging
7.9 Trial Dredging
8 Vehicle Load
8.2 Dredge Pump Characteristics
8.3 Pipeline Characteristics
8.4 Determination of Dredge Pump and Pipeline Working Area
8.5 Booster Pump Transportation
8.6 Crack Prevention Measures for Mass Concrete
8.7 Construction Defects Repairing
9 Cargo Cable Load
9.2 Dredged Material Assessment
9.3 Dredged Material Utilization
9.4 Dredged Material Disposal
9.5 Dredged Material Treatment
9.6 Unbounded Prestressing

1 Foreword

JTS 166-2020 was issued by Ministry of Transport on 29 May 2020 and has been in force since 1 August 2020.

It replaces the earlier edition JTJ 212-2006.

The JTS prefix, without a suffix, marks a mandatory standard: within its scope, compliance is required.

2 Scope Preview

This code is applicable to the overall design of new construction, reconstruction and expansion of inland river ports. The inland LNG terminal shall be implemented in accordance with the relevant regulations of the current industry standard "Liquefied Natural Gas Terminal Design Specification" (JTS 165-5). For estuarine ports where inland ships or sea ships dock mainly due to tidal action, and river ports that have river hydrological characteristics and are affected by tides, the overall design can be based on this code and the current industry standard "General Design Specification for Sea Ports" ??(JTS 165) relevant regulations are implemented.

https://chinastandards.org/standards/jts-166-2020

JTS 166-2020 falls under ICS 93.140, in the field of civil engineering.

This catalogue holds 48 other JTS standards in that field.

In this catalogue, JTS standards carry edition years from 2007 to 2024.

3 About this standard

Issued by: Ministry of Transport

English translation: about 105 pages

Chinese original: about 159,176 characters

Supersedes the earlier edition JTJ 212-2006.

4 Related standards

Standards on related subjects:

JTS/T 156-2024 - Design specification for dust control at coal ore terminals

JTS/T 160-2021 - Technical specification for construction of water transport video monitoring system

JTS/T 159-2021 - Technical Specification for Application of Form Bag Concrete in Water Transportation Engineering

5 Classification and status

International classification (ICS): 93.140

Chinese Standard Classification (CCS): P 67

Prefix JTS: mandatory standard.
