Table of Contents

[Preview only]
1 Scope
2 Normative references
3 Classification
4 Requirements
4.1 Qualitative analysis of phases
4.2 Quantitative analysis of phase
4.3 Determination of grain size and lattice distortion
4.4 Determination of unit cell parameters of cubic crystals
4.5 Solving the crystal structure from ab initio polycrystalline diffraction data
4.6 High and low temperature diffraction
5 Reagents and materials
5.1 Standard material
5.2 Organic solvents
5.3 Sieves
5.4 Sample preparation tools
5.5 Microscope
5.6 Specimen plate
6 Instruments
6.1 Composition of the instrument
6.2 Verification or calibration
6.3 XZGJ Higher Education Management Data Subset
6.4 XZSF Teacher Education Management Data Subset
7 Samples
7.1 Pretreatment of samples
7.2 Filling of the specimen plate
7.3 Judge whether the specimen plate is available
8 Analysis steps
8.1 Startup and parameter setting of the instrument
8.2 Steps of phase qualitative analysis
8.3 Steps for phase quantitative analysis
8.4 Determination of grain size and lattice distortion by linewidth method

8.5 Procedure for determination of unit cell parameters of cubic crystals

1 Foreword

JY/T 0385-2006 was issued by Ministry of Education of the People's Republic of China on 19 August 2006 and has been in force since 1 October 2006.

The JY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the basic requirements for the construction of ordinary primary and secondary science laboratory equipment, including the " functions and requirements", " area with a number ", " construction requirements", "Environmental Requirements", " fixed installations ", " layout " and " Laboratory equipment "and other seven areas. This standard applies to equipment and construction of ordinary primary and secondary science laboratories. Among them, the nine-year school and complete high school in this standard did not separate. In actual implementation, the nine- school school size according to the standard reference to the relevant content of elementary and junior high school into account. Complete secondary school may refer to this part of the standard high school considered.

JY/T 0385-2006 is filed under Chinese Standard Classification Y 51, in the field of light industry and consumer goods.

This catalogue holds 89 other JY/T standards without an ICS number.

In this catalogue, JY/T standards carry edition years from 2002 to 2026.

3 About this standard

Issued by: Ministry of Education of the People's Republic of China

English translation: about 8 pages

Chinese original: about 12,153 characters
