1 Foreword

KA 27.3-2025 was issued by National Mine Safety Administration on 1 September 2025.

It is one of 6 parts of the KA 27 series.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the terms and definitions, general provisions, design, construction, quality inspection and effect verification, acceptance and summary technical requirements for coal seam floor underground grouting modification and reinforcement engineering under pressure mining conditions. This document is applicable to the underground grouting renovation and reinforcement project of coal seam floors carried out in coal mines under pressure mining.

KA 27.3-2025 falls under ICS 73.020, in the field of mining and minerals.

This catalogue holds 14 other KA standards in that field.

In this catalogue, KA standards carry edition years from 1982 to 2026.

3 About this standard

Issued by: National Mine Safety Administration

English translation: about 7 pages

Chinese original: about 11,145 characters

4 Related standards

Other parts of this standard:

KA 27.1-2025 - Part 1: Prevention and control of roof water disaster

KA 27.2-2025 - Part 2: Structure exploration and treatment of coal floor for water disaster

KA 27.4-2025 - Part 4: Ground area governance

KA 27.5-2025 - Part 5: Goaf water prevention and control

KA 27.6-2025 - Part 6: Water disaster risk monitoring and forewarning system

Standards on related subjects:

MT/T 1091-2008 - Standard for exploration and evaluation of hydrogeology, engineering geology and environment geology in coal beds

DZ/T 0200-2002 - Specification for iron, manganese and chromium mineral exploration

DZ/T 0206-2002 - Specifications for kaolinite, bentonite, refractory. Clay mineral exploration

5 Classification and status

International classification (ICS): 73.020

Chinese Standard Classification (CCS): D 14
