1 Foreword

KA/T 16-2023 was issued by State Mine Safety Supervision Administration on 26 October 2023 and has been in force since 31 January 2024.

It replaces the earlier edition MT 523-1995.

The KA/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the product classification, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage of explosion-proof low-energy gamma-gamma combination logging tools for coal mines (hereinafter referred to as "logging tools"). This standard applies to the design, manufacture and inspection of explosion-proof low-energy gamma-gamma combination logging instruments in coal mines.

KA/T 16-2023 falls under ICS 73.100.99, in the field of mining and minerals.

This catalogue holds 19 other KA/T standards in that field.

In this catalogue, KA/T standards carry edition years from 2023 to 2026.

3 About this standard

Issued by: State Mine Safety Supervision Administration

English translation: about 7 pages

Chinese original: about 11,141 characters

Supersedes the earlier edition MT 523-1995.

4 Related standards

Standards on related subjects:

KA/T 17-2023 - Density logging instruments used in coal mine

KA/T 15-2023 - Rayleigh wave seismograph used in coal mine

KA/T 13-2023 - Water pressure recorder in coal mine

5 Classification and status

International classification (ICS): 73.100.99

Chinese Standard Classification (CCS): D 82

Prefix KA/T: recommended standard.
