1 Foreword

KA/T 22.1-2024 was issued by State Mine Safety Supervision Administration on 12 October 2024 and has been in force since 1 November 2024.

It is one of 3 parts of the KA/T 22 series.

The KA/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the terms and definitions, principles and basic requirements of the survey of hidden disaster factors in mines (hereinafter referred to as the survey), survey preparation, survey implementation, compilation and reporting of survey results, etc. This standard applies to the survey of hidden disaster factors in mines conducted by mining enterprises on their mines (including tailings ponds, the same below) and the regional survey of hidden disaster factors in mines organized by local governments.

KA/T 22.1-2024 falls under ICS 73.020, in the field of mining and minerals.

This catalogue holds 19 other KA/T standards in that field.

In this catalogue, KA/T standards carry edition years from 1986 to 2026.

3 About this standard

Issued by: State Mine Safety Supervision Administration

English translation: about 11 pages

Chinese original: about 16,137 characters

4 Related standards

Other parts of this standard:

KA/T 22.2-2024 - Part 2: Coal mine

KA/T 22.3-2024 - Part 3: Metal nonmetal mines and tailings ponds

Standards on related subjects:

AQ 1043-2007 - Mining Products Safety Label

AQ 6206-2006 - Coal mine high-low concentration methane transducer

MT 113-1995 - General Test Methods and Judgment Rules for Fire-resistant Antistatic Properties of Polymer Products for Coal Mines

KA 28-2026 - Methods for evaluating coal seam outburst risk

5 Classification and status

International classification (ICS): 73.020

Chinese Standard Classification (CCS): D 09

Prefix KA/T: recommended standard.
