What this standard covers

This standard provides guidance on the principles, general design process, tourism element design, and factors to be considered in the design of barrier-free tourism routes. This standard applies to institutions and units that design, develop, provide services, and manage barrier-free tourism routes for people with disabilities, the elderly, and other tourists with barrier-free service needs.

Document data

International classification (ICS): 03.200.

Chinese classification (CCS): A12.

Estimated length of the Chinese original: 11,199 words.
