What this standard covers

This standard specifies the technical requirements for vertical data synchronization between human resources and social security departments at the ministry and provincial levels, including data synchronization management, data synchronization types, data synchronization processes, platform access specifications, transmission security specifications and operation and maintenance management specifications. This standard applies to database (table) synchronization and data file synchronization between the information system of the Ministry of Human Resources and Social Security and the information system of the Human Resources and Social Security Department of various provinces, autonomous regions, municipalities and Xinjiang Production and Construction Corps (referred to as the information system).
