What this standard covers

This standard specifies a method for determining deoxynivalenol in cereals using fluorescence immunochromatography. It specifies the requirements for reagents and materials, instruments and equipment, sample preparation, sample determination, result expression, and precision. This document applies to the rapid quantitative detection of deoxynivalenol in wheat and corn.

Document data

International classification (ICS): 67.040.

Chinese classification (CCS): X11.

Estimated length of the Chinese original: 6,674 words.
