What this standard covers

This standard specifies the temperate forest ecosystem observations, namely meteorological conventional indicators, forest microclimate and gradient index, the forest atmospheric deposition targets, the physical and chemical indicators of forest soils, forest ecosystem health indicators, indicators of forest hydrology and forest community characteristics indicators. This standard applies to our range of temperate forest ecosystem observation.

Document data

International classification (ICS): 65.020.

Chinese classification (CCS): B65.

Estimated length of the Chinese original: 11,112 words.
