Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

This document replaces LY/T 2005-2012 "National Forest Park Master Plan Specifications". Compared with LY/T 2005-2012, in addition to structural adjustments and editorial changes, the main technical changes are as follows.

- a) The scope of application has been changed (see Chapter 1, Chapter 1 of the 2012 edition).
- b) The normative references have been changed (see Chapter 2, Chapter 2 of the 2012 edition).

c) Added the definition of "forest park" and the term "main protected object", changed the definition of "national forest park", deleted the term "forest Park master plan", "forest landscape resources", "landscape", "attractions", "scenic spots", "tour routes", "comprehensive functional zoning", "ecological capacity", "human terms such as "population capacity" and "eco-culture" (see Chapter 3, Chapter 3 of the 2012 edition).

d) The nature and development objectives of forest parks have been changed, and the planning principles, main protection objects and planning tasks of forest parks have been added.

(See Chapter 4, 5.2 of the 2012 edition).

e) The content of basic data investigation and evaluation has been modified (see Chapter 5, 5.1 of the 2012 edition).

f) The classification and content of functional zoning have been changed (see Chapter 6, 5.3 of the 2012 edition).

g) The ecological culture section (see 6.3 of the 2012 edition) has been deleted, and the relevant content has been presented in Chapter 8 (see Chapter 8).

h) Deleted the contents related to source market, development strategy and marketing strategy (see 5.5 of the 2012 edition).

i) The planning of ecotourism activities and service facilities has been modified (see Chapter 8, 6.4 of the 2012 edition).

j) Added the content of "management facilities" (see Chapter 9).

k) The content of "infrastructure" construction has been changed (see Chapter 9, 6.5 of the 2012 edition).

l) The content of land use classification has been changed and the land use classification has been clarified (see Chapter 10, 6.6 of the 2012 edition).

m) The content of community development planning has been modified (see Chapter 10, 6.7 of the 2012 edition).

n) Added ecological impact assessment content (see Chapter 12).

o) The content of capital calculation has been changed (see Chapter 13, 8.1 of the 2012 edition).

p) The planning output and depth requirements have been changed (see Chapter 14, Appendix B, 9.2 of the 2012 edition).

This document was proposed by the State Forestry and Grassland Administration.

This document is under the jurisdiction of the National Forestry and Grassland Administration Ecotourism Standardization Technical Committee (NFGA/TC3).

1 Scope

This document defines the nature, objectives and main protected objects of national forest parks, and clarifies the overall planning principles, basic conditions, scope and Zoning, resource protection, rational use, facility construction, etc., proposed land use, visitor safety, community development, disaster prevention and mitigation, organizational management and other special planning requirements.

This document applies to the preparation, review and implementation evaluation of the national forest park master plan.

Please refer to this document for implementation.

2 Normative references

The contents of the following documents constitute the essential clauses of this document through normative references in this document.

For referenced documents without a date, only the version corresponding to that date applies to this document; for referenced documents without a date, the latest version (including all amendments) applies to this document.

GB 3838 Surface water environmental quality standard GB 5749 Sanitary standard for drinking water GB 18306 China Earthquake Motion Parameter Zoning Map
