Drafters of this standard. Jin Wei, Wang Zhen, Yang Tiantian, Xiao Guangyi, Luo Yuzhong, Luo Xun, Zhou Baijun.

Introduction

Like the endangered species that the international community attaches great importance to, the ivory is the main raw material for the tooth carving crafts. As the population of elephants declines, the dental carving technique for the national intangible cultural heritage faces a crisis that has been lost due to lack of ivory raw materials. To properly handle image resource protection and Promote the standardized management of the domestic ivory market, such as the rational use of products, and refer to the Endangered Wildlife and Plants according to relevant laws and regulations of China.

Convention on International Trade Conventions (CITES) Conf.10.10 (Rev. CoP15) and 13.26 (Rev. CoP15) the country and the requirements for controlling domestic trade in ivory have formulated the Technical Specifications for the Registration of Ivory and Ivory Products. This standard will be for China Further standardize ivory processing and business activities, scientifically and rationally utilize limited resources, promote the inheritance of dental carving techniques and traditional culture, and protect elephant species.

The group plays a driving role.
