4.1 Protection management carried out in accordance with the law

Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard was proposed by the Science and Technology Development Center of the State Forestry Administration.

This standard is under the jurisdiction of the National Forest Sustainable Management and Forest Certification Standards Committee.

This standard was drafted. Beijing Forestry University Nature Reserve College.

Introduction

Carrying out the forest ecological environment service certification of nature reserves is an important means to realize the sustainable development of nature reserves, which is conducive to nature conservation.

The management of the protected area fully understands its own level of protection and management, which is conducive to the timely management of the management effectiveness of the nature reserve by the industry management department.

It is conducive to the community to understand the forest ecological environment service function of the nature reserve.

This standard stipulates the indicator system to be followed in forest ecological environment service certification of forest nature reserves, including 7 first-level indicators, 35 secondary indicators and 108 third-level indicators. Among them, "protection management is carried out according to law", "management capacity is in place", "biodiversity protection" Five effective indicators, effective "environmental protection of the ecological environment" and "sound function of scientific research and mission" are all necessary for all nature reserves.

Indicators to be reviewed; "Ecological tourism is in order" includes indicators for the review of nature reserves that carry out tourism activities;

Health Harmony contains indicators that only review nature reserves with surrounding communities.

China Forest Certification Forest Ecology Environment Service Nature Reserve

1 Scope

This standard specifies the indicator system that should be followed in forest ecological environment service certification for forest nature reserves.

This standard applies to qualified forest certification agencies to carry out forest ecological environment service recognition for forest nature reserves nationwide.

Certificate review, other types of nature reserves can refer to implementation.
