What this standard covers

This standard specifies the feasibility report on the use of forest land for construction projects and the principles, procedures, contents and requirements for the use of the forest land survey questionnaire. This standard shall be applicable to the feasibility report on the use of forest land for construction projects nationwide and shall be compiled using the questionnaire on forest land status. This standard does not apply to the construction of forest services directly for the project to occupy forest land.

Document data

International classification (ICS): 65.020.

Chinese classification (CCS): B60.

Estimated length of the Chinese original: 24,269 words.
