What this standard covers

This standard specifies the technical requirements for soil improvement, land reclamation and consolidation, selection of stress-resistant plant materials, artificial vegetation restoration seedling quality standards, and ecological afforestation in abandoned non-ferrous metal mining areas in the south of the Yangtze River. This standard is applicable to the ecological restoration of abandoned land in non-ferrous metal mining areas in the south of the Yangtze River. The restoration of vegetation in abandoned areas in other areas can be implemented.
