Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part 1: Structure and Drafting Rules of Standardization Documents".

Drafting.

This document replaces LY/T 2798-2017 "Specifications for the Installation of Forest Fire Prevention Publicity Facilities". Compared with LY/T 2798-2017, the main differences are in the structural design.

Aside from the integration and editing changes, the main technical changes are as follows.

- a) The scope has been changed (see Chapter 1, Chapter 1 of the 2017 edition).
- b) Terms and definitions have been changed (see Chapter 3, Chapter 3 in the 2017 edition);
- c) The setting principles have been removed (see Chapter 4 of the 2017 edition);
- d) Basic requirements have been added (see Chapter 4);
- e) Fixed installations have been removed (see Chapter 5 of the 2017 edition);
- f) Temporary facilities have been removed (see Chapter 6 of the 2017 edition);
- g) Added setup requirements (see Chapter 5);
- h) Added setup methods and management measures (see Chapter 6);
- i) Added verification methods (see Chapter 7);
- j) The design of the forest fire prevention mascot has been removed (see Appendix A of the 2017 edition).

Please note that the content of this document may involve patents. The issuing organization

of this document assumes no responsibility for identifying patents.

This document was proposed by the National Forestry and Grassland Administration.

This document is under the jurisdiction of the National Technical Committee on Standardization of Forest and Grassland Fire Prevention (SAC/TC 523).

1 Scope

This document specifies the relevant requirements for the standardized installation of forest and grassland fire prevention publicity facilities (hereinafter referred to as "publicity facilities"), and describes the corresponding requirements.

Verification method.

This document applies to the installation and management of forest and grassland fire prevention publicity facilities.

2 Normative references

This document has no normative references.

3 Terms and Definitions

The following terms and definitions apply to this document.

Forest and grassland fire prevention publicity facilities Fixed facilities used for displaying and broadcasting forest and grassland fire prevention publicity and warning content and information.

Note: This mainly includes propaganda monuments, billboards, bulletin boards, warning flagpoles, cartoon propaganda materials, electronic displays, electronic propaganda devices, loudspeakers, and sound columns.

4 Basic Requirements

4.1

The competent departments for forest and grassland fire prevention, forest and grassland operators, and related units shall set up publicity facilities in forest and grassland fire prevention areas, using graphic and textual methods.

Using vivid, three-dimensional, and integrated technologies such as sound, light, and electricity, we can effectively leverage the role of fire prevention publicity and education.

4.2

Establishing farms, factories, mines, and other enterprises in forest and grassland fire prevention zones, as well as setting up tourist attractions, newly developing zones, and

large-scale afforestation projects.

Publicity facilities should be constructed simultaneously in districts, key project areas, and other similar locations.

4.3

The publicity facilities should be placed in locations with frequent personnel activity and high visibility, and should be in harmony with the surrounding environment.

4.4

Display and playback promotional facilities should be selected according to local conditions, and new technologies, processes, materials and products should be actively adopted.

4.5

The content displayed and played should use standardized and civilized language to achieve a publicity and warning education effect that is easy to understand and memorable.

4.6

When displaying or playing content involving forest fire prevention safety signs and forest fire risk warning signals, relevant technical specifications shall be followed.

4.7

The content displayed and played should be updated in a timely manner according to the actual needs of forest and grassland fire prevention work.

4.8

When setting up publicity facilities, the requirements of the restrictive technical specifications of transportation and other departments shall be met.

5.1 Location

The following locations should be equipped with promotional facilities.

- a) Major road intersections within forest and grassland fire prevention zones;
- b) Major road intersections within the jurisdiction of forest and grassland management units;
