What this standard covers

This standard specifies the requirements for the implementation of electronic release procedures for air cargo security checks, including the participating entities and personnel, release processes, and verification markings. This document applies to information exchange between air cargo sales agents, ground service agents (hereinafter referred to as "ground agents") and civil aviation security inspection agencies to complete electronic release procedures for air cargo security checks, as well as the planning and design of system interfaces for information exchange.

Document data

International classification (ICS): 03.220.50.

Chinese classification (CCS): V52.

Estimated length of the Chinese original: 14,136 words.
