What this standard covers

This standard specifies the competency requirements, technical requirements for competency assessment systems, and methods of competency assessment for distributed operators of civil unmanned aircraft systems (UAS). It applies to light, small, and medium-sized multi-rotor civil UAS operating in segregated airspace below an altitude of 120 meters above ground level, and is used to assess the competency of distributed operators of such systems.

Document data

International classification (ICS): 49.020.

Chinese classification (CCS): V00.

Estimated length of the Chinese original: 14,142 words.
