What this standard covers

This standard specifies the interoperability requirements between recorders supporting VoIP functionality in civil aviation air traffic services and VoIP VHF air-to-ground voice communication systems and VoIP voice communication switching systems. This standard applies to the operation, design, manufacturing, integration, testing, and inspection of recorders, VoIP VHF air-to-ground voice communication systems, and VoIP voice communication switching systems supporting VoIP functionality, such as those used in civil aviation air traffic services.

Document data

International classification (ICS): 03.220.50.

Chinese classification (CCS): V54.

Estimated length of the Chinese original: 13,164 words.
