What this standard covers

This standard specifies the basic requirements for civil aircraft refueling and defueling, including operations at commercial airports and general aviation airports, as well as requirements for personnel, equipment, aviation fuel quality control, and metering. It applies to aviation fuel supply enterprises conducting refueling and defueling operations for various types of aircraft at commercial and general aviation airports. Aircraft operators conducting their own refueling operations may refer to this standard.

Document data

International classification (ICS): 49.100.

Chinese classification (CCS): V56.

Estimated length of the Chinese original: 23,256 words.

Supersedes the earlier edition MH/T 6005-2009.
