What this standard covers

This standard specifies requirements for instruments and equipment, reagents and consumables, pre-test preparations, test procedures, calculation of internal leakage in the test valve, and reporting for testing the corrosion resistance of aviation fire-resistant phosphate ester hydraulic fluid (hereinafter referred to as "hydraulic fluid") using a flow control valve (hereinafter referred to as the "test valve") under specific temperature, pressure, and flow rate conditions. This document applies to the testing of the corrosion resistance of hydraulic fluid.

Document data

International classification (ICS): 75.120.

Chinese classification (CCS): E39.

Estimated length of the Chinese original: 23,296 words.
