What this standard covers

This standard specifies the architecture, basic requirements, functional requirements, interface requirements, safety and reliability requirements, wireless technical requirements, environmental and electromagnetic compatibility test requirements for cabin wireless access points (hereinafter referred to as CWAP). This standard applies to the design, development, testing, installation and acceptance of CWAP for airborne wireless local area entertainment systems (hereinafter referred to as passenger cabin Wi-Fi systems) for civil aircraft (including private jets).

Document data

International classification (ICS): 49.090.

Chinese classification (CCS): L07.

Estimated length of the Chinese original: 10,116 words.
