What this standard covers

This standard specifies the method for the determination of potassium dichromate coal chemical oxygen demand of water. This standard applies to the determination of chemical oxygen demand of coal mine water in. This standard measurement range of concentrations of chemical oxygen demand was 30mg/L ~ 500mg/L. Dilution water samples can be expanded measurement range.

Document data

International classification (ICS): 13.060.30.

Chinese classification (CCS): Z23.

Estimated length of the Chinese original: 6,643 words.

Adopted international standard: ISO 06060, NEQ.
