What this standard covers

This standard specifies the determination of coal granular activated carbon adsorption capacity and H₂S breakthrough time penetrating the sample used in the test, instruments and equipment, measuring step, precision expression results and methods, This standard applies to coal granular activated carbon adsorption of H₂S penetrate Determination of capacity and breakthrough time. Also applies to shell charcoal, spent activated carbon and regeneration.

Document data

International classification (ICS): 73.040.

Chinese classification (CCS): D21.

Estimated length of the Chinese original: 12,170 words.

Adopted international standard: ASTM D6646-2001, MOD.
