What this standard covers

This standard specifies the coal and coke ash silicon measured by X-ray fluorescence spectrometry, aluminum, iron, calcium, magnesium, sodium, potassium, phosphorus, titanium, manganese, barium, strontium method feeds, reagents and materials, equipment, test procedure, , sample Preparation calibration, result of the calculation and precision of the method. This standard applies to coal and coke.

Document data

International classification (ICS): 75.160.10.

Chinese classification (CCS): D21.

Estimated length of the Chinese original: 9,993 words.

Adopted international standard: ASTM D4326-2004, MOD.
