What this standard covers

This standard specifies the coal with carbon molecular sieve nitrogen unit (hereinafter referred to as "nitrogen plant") terms and definitions, model specifications, technical requirements, test methods, inspection rules and signs, packaging, transport and storage. This standard applies at room temperature, pressure swing adsorption. Separation system to take nitrogen from the air, ground coal mine fixed, terrestrial mobile and underground carbon molecular sieve nitrogen mobile devices.

Document data

International classification (ICS): 29.260.20.

Chinese classification (CCS): D98.

Estimated length of the Chinese original: 15,188 words.
