What this standard covers

This standard specifies the calculation of coal with the re-election of the process equipment performance computer algorithms, these indicators include possible bias, imperfect degree, quantity, etc. with total efficiency and wrong things. This standard applies to the aqueous medium and heavy medium coal sorting operations of various re-election assessment process equipment performance. This standard does not apply to integrated information processing Coal month.

Document data

International classification (ICS): 73.1.

Chinese classification (CCS): D96.

Estimated length of the Chinese original: 993 words.

Supersedes the earlier edition MT 145-1986.
