What this standard covers

This standard specifies the technical requirements for coal mine conveyor mechanical joints; also provides static and dynamic test methods and inspection rules for joint strength. This standard applies to coal conveyor belt with woven fiber mechanical joints, including removable and can not be demolished various types of mechanical joints. This standard does not apply to the conveyor belt vulcanization, plastics and adhesive joints.

Document data

International classification (ICS): 53.040.20.

Chinese classification (CCS): J81.

Estimated length of the Chinese original: 10,179 words.

Adopted international standard: BS 4890-1973, NEQ; DIN 22110-1993, NEQ.

Supersedes the earlier edition MT 318-1992.
