What this standard covers

This standard specifies the determination of the oxygen consumption of coal mine water with potassium permanganate index method, This standard applies to the determination of chemical oxygen demand of coal mine water. This standard measurement range of concentrations of chemical oxygen demand was 0. 5mg/L ~ 4. 0mg/L.

Document data

International classification (ICS): 73.040.

Chinese classification (CCS): D21.

Estimated length of the Chinese original: 8,891 words.

Supersedes the earlier edition MT/T 369-1994.
