What this standard covers

This standard specifies the system composition, technical requirements, test methods, inspection rules, marking, instructions, packaging, transportation, and storage for dry-cleaning robots used on photovoltaic modules. This standard applies to fully automatic dry-cleaning robots that travel along the frames of photovoltaic modules or fixed rails within a photovoltaic power station environment.

Document data

International classification (ICS): 01.040.29.

Chinese classification (CCS): F29.

Estimated length of the Chinese original: 21,210 words.
