1 Foreword

NB/T 32005-2026 was issued by National Energy Administration on 26 June 2026 and takes effect on 26 December 2026.

It replaces the earlier edition NB/T 32005-2013.

The NB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

NB/T 32005-2026 carries no ICS number and no Chinese Standard Classification code.

This catalogue holds 4,537 other NB/T standards.

Of the 1,959 NB/T standards that do carry an ICS number, 1,265 (65%) fall under ICS 27, in the field of energy and heat transfer engineering.
