NB

**ENERGY INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

NB/T 51028-2015

**Code for coal mine construction organization plan of coal
industry**

煤炭工业矿井施工组织设计规范

Issued on: April 2, 2015

Implemented on: September 1, 2015

Issued by: National Energy Administration of the PRC

Table of Contents

1 General Provisions	1
2 Terms	2
3 Basic Requirements	4
4 General Construction Arrangement	6
5 Construction Preparation	9
6 General Construction Layout Plan	10
7 The Major Units Projects	11
8 The Main Production System of Coal Mine	18
9 Master Schedule	22
10 Management by Objectives Plan	24
11 Safety and Occupation Health	26
12 Green Construction	27
13 Attached Charts and Tables	28
Appendix A Addicting Outline of Mine Construction Organization	29
Appendix B Summary Table of Mine Construction Investment Program Every Year.....	31
Appendix C Tables of Tunnel Engineering Construction Schedule and Investment Program	32
Appendix D Tables of Civil Engineering Construction Schedule and Investment Program	33
Appendix E Tables of Equipment, Installation and Investment Program.....	34
Appendix F Table of Engineering Construction other Investment Schedule.....	35
Appendix G Summary Table of Labor Requirements	36
Appendix H Table of Main Equipment Supply Schedule	37
Appendix I Table of Main Material Supply Schedule	38
Appendix J Table of Construction Drawing Supply Schedule	39
Explanation of Wording in This Code	40
List of Standards Quoted	41
Addition: Explanation of Provisions	42

Foreword

This document was issued on 2 April 2015 by the National Energy Administration of the PRC and takes effect on 1 September 2015.

It is a NB/T standard: recommended rather than compulsory, but it is the text a Chinese reviewer applies when assessing a submission.

It is classified under ICS 73.020, Chinese classification P 00/09.

This code has been prepared in accordance with the requirements of the Notice of the National Energy Administration on Issuing the First Batch of the 2013 Compilation and Revision Plan for Energy Sector Industry Standards (Guo Neng Ke Ji [2013] No. 235).

Under that plan the China Coal Construction Association organised Shaanxi Coal and Chemical Industry Group Co., Ltd., China Coal Xi'an Design Engineering Co., Ltd. and other relevant units to carry out the compilation work.

In the course of the compilation the working group carried out extensive investigation and analysis, and summarised the experience gained in the Chinese coal industry over recent decades in the preparation and the management of mine construction organization plans.

The working group gave full consideration to the differing circumstances of the various regions and of the various enterprises, and worked on the basis of the relevant laws, regulations and standards in force.

The code was developed by revising and completing the document Code for Coal Mine Construction Organization Plan of Coal Industry (Trial), previously released by the China Coal Construction Association. After opinions had been widely solicited, the text was submitted to a final review and settled.

The code is made up of thirteen chapters. Its principal content covers general provisions, terms, basic requirements, the general construction arrangement, construction preparation, the general construction layout plan, the major unit projects, the main production system of the coal mine under construction, the master schedule, the management by objectives plan, safety and occupational health, green construction, and the attached charts and tables.

The National Energy Administration is responsible for the administration of this code, and the China Coal Construction Association is responsible for its day-to-day management.

Shaanxi Coal and Chemical Industry Group Co., Ltd. and China Coal Xi'an Design Engineering Co., Ltd. are responsible for the interpretation of the specific technical content.

Users who find, in the course of applying the code, that a point needs to be amended or supplemented are invited to send their comments and the relevant material to Shaanxi Coal and Chemical Industry Group Co., Ltd. (No. 1 Jinye Road, Hi-Tech Zone, Xi'an, Shaanxi Province, postcode 710065) or to China Coal Xi'an Design Engineering Co., Ltd. (No. 66 North Yanta Road, Xi'an, Shaanxi Province, postcode 710054), so that they may be taken into account at the next revision.

Chief editing units: Shaanxi Coal and Chemical Industry Group Co., Ltd.; China Coal Xi'an

Design Engineering Co., Ltd.

Participating units (first part): Guizhou Provincial Coal Mine Design and Research Institute; Henan Engineering Consulting and Supervision Co., Ltd.; Chongqing Juneng Construction (Group) Co., Ltd.; Shandong University of Science and Technology; Anhui University of Science and Technology.

Participating units (second part): Coal Industry Jinan Design and Research Institute Co., Ltd.; Shanxi Chengzheng Construction Supervision and Consulting Co., Ltd.; Huaibei Mining Engineering Construction Company; Shanxi Sanyuan Coal Industry Co., Ltd.; the No. 33 Engineering Department of China Coal No. 3 Construction (Group) Co., Ltd.; Shaanxi Coal and Chemical Industry Construction (Group) Co., Ltd.

The foreword names twenty-four principal drafters. The first group is Zhang Baixiang, Cheng Jiao, Zhang Jiaxun, Kang Luan, Jia Hongjun, Jiang Yusong, Liu Jianling, Song Hongjun, Gong Bingjiang, Xing Jinlin, Tan Jie and Lyu Baojin.

The second group of principal drafters is Wu Xinhua, Yan Guanglao, Zhu Jieli, Gong Shoucai, Qin Jiazhi, Wang Jianli, Wei Yunbo, Sun Yuehua, Li Changyu, Wang Mingzhi, Yuan Wei and Wu Chengfa.

The foreword names twenty-two principal reviewers. The first group is An Heren, Zhang Shengli, Sun Shouren, Xu Yili, Li Bingsheng, Xu Xiangrong, Zhang Qiang, Chen Minghuai, Pu Xianxue, Fan Qiang and Zhao Chunxiao.

The second group of principal reviewers is Li Lihua, Dai Dongsheng, Wang Pengyue, Ren Jianxi, Yang Deying and Zhangsun Xueting, together with the further reviewers listed with them on the same page of the foreword.

Publication data

NB/T 51028-2015 is an energy sector standard of the People's Republic of China, issued in the NB series by the National Energy Administration. The cover carries the designation NB/T 51028-2015 together with the Chinese title and the official English title printed by the publisher.

The international classification code shown on the cover is ICS 73.020, the group that covers mining and quarrying.

The Chinese document classification code shown on the cover is P 00/09, the group used for engineering construction and prospecting documents of a general and comprehensive character.

The cover also carries the filing record number J2035-2015, the registration number given to the code when it was placed on record as an engineering construction sector standard.

The date of issue printed on the cover is 2 April 2015.

The date of implementation printed on the cover is 1 September 2015, which is repeated on the inner title page as the date on which the code takes effect.

The issuing body printed at the foot of the cover is the National Energy Administration.

The inner title page names the chief editing department as the China Coal Construction Association.

The inner title page names the approving department as the National Energy Administration.

The code was published by the China Coal Industry Publishing House, Beijing, in 2015.

The cover carries no replacement note, so no earlier numbered standard is formally superseded by this edition. The foreword nevertheless records that the code was developed by revising and completing the trial document Code for Coal Mine Construction Organization Plan of Coal Industry (Trial) previously released by the China Coal Construction Association.

Structure of the code

The following outline reproduces the official structure of the code as printed in the Chinese table of contents and in the English Contents pages of the standard itself. The wording of the chapter titles is that of the official English Contents.

- 1 General Provisions, page 1.
- 2 Terms, page 2.
- 3 Basic Requirements, page 4.
- 4 General Construction Arrangement, page 6.
- 5 Construction Preparation, page 9.
- 6 General Construction Layout Plan, page 10.
- 7 The Major Units Projects, page 11.
- 8 The Main Production System of Coal Mine, page 18.
- 9 Master Schedule, page 22.
- 10 Management by Objectives Plan, page 24.
- 11 Safety and Occupation Health, page 26.
- 12 Green Construction, page 27.
- 13 Attached Charts and Tables, page 28.
