What this standard covers

This standard specifies the chloride ion content in the soil of potentiometric titration method. This standard applies to the chloride ion content (with Cl-) at 1mg/L ~ 1500mg/L of sample solution (aliquot of the test solution in the titration of chloride ion content of 0.01mg ~ 75mg). When using a standard solution of silver nitrate concentration is less than 0.02mol/L, the titration should be in ethanol aqueous solution.

Document data

International classification (ICS): 13.080.20.

Chinese classification (CCS): B10.

Estimated length of the Chinese original: 11,137 words.
