What this standard covers

This standard specifies the basic requirements for greenhouse ventilation design, indoor air design parameters, calculation of necessary ventilation, natural ventilation system design, fan ventilation system design, indoor air circulation system design and ventilation system annual operation control scheme design. This standard applies to the engineering design of the greenhouse ventilation system and the design of the annual operation regulation scheme. This standard does not apply to non-natural light source lighting greenhouses (such as plant factories).

Document data

International classification (ICS): 65.040.01.

Chinese classification (CCS): P35.

Estimated length of the Chinese original: 80,894 words.

Supersedes the earlier edition NY/T 1451-2007.
