What this standard covers

This standard specifies the thermal insulation properties of greenhouse covering terms and definitions, evaluation parameters, test theory, test equipment, test conditions, test pieces and installation of measuring points on the test method. This standard applies to the monolayer coverage of greenhouse covering materials and multilayer insulation performance evaluation, other agricultural facilities covering material insulation properties can also be implemented by reference.

Document data

International classification (ICS): 65.040.30.

Chinese classification (CCS): P35.

Estimated length of the Chinese original: 11,173 words.
