What this standard covers

This standard specifies the vegetable foods lanthanum, cerium, praseodymium, neodymium and samarium five kinds of rare earth plasma emission spectroscopy method. This standard applies to the determination of rare earth elements in plant foods. This standard method detection limit of each element in Appendix A.

Document data

International classification (ICS): 67.080.

Chinese classification (CCS): X04.

Estimated length of the Chinese original: 9,940 words.
