What this standard covers

This Standard specifies the method for the determination of complex feed, feed raw materials and phosphate apparent digestibility formula aquatic animals, including the preparation of selection, markers of the experimental diets, feeding experiments with samples of fish collected, the analysis methods and results. This Standard applies to the determination of apparent digestibility with feed, feed ingredients and phosphate in certain nutrients in aquatic animals.

Document data

International classification (ICS): 67.120.30.

Chinese classification (CCS): B50.

Estimated length of the Chinese original: 9,952 words.

Supersedes the earlier edition SC/T 1089-2006.
