What this standard covers

This Standard specifies the remote sensing of crop chilling injury process, content, technology and methods, and the results of the basic norms of quality control report prepared. This Standard applies to crops delayed cool injury satellite remote sensing monitoring. The use of other data sources to carry out crop delayed cool injury monitoring may refer to.

Document data

International classification (ICS): 65.020.01.

Chinese classification (CCS): B04.

Estimated length of the Chinese original: 15,114 words.
