What this standard covers

This standard specifies the determination of flavonoids in fruit by liquid chromatography. This standard is applicable to the determination of the main flavonoids in the fruits of pome fruits (apples, pears and mountains). The limits of detection and limits of quantitation for the methods of this standard are given in Annex A.

Document data

International classification (ICS): 67.08.

Chinese classification (CCS): B31.

Estimated length of the Chinese original: 10,177 words.
