What this standard covers

This standard specifies the general requirements, test methods, inspection rules, marking, packaging, transportation and storage of soil conditioners. This standard is applicable to the production, sale and use of the territory of the People's Republic of China. It is used to prepare barrier soils and improve their physical, chemical and/or biological properties. Mineral raw materials, organic raw materials, and chemical raw materials are used as constituents. Standardized soil processing agent for the production of soil conditioners. This standard does not apply to soil conditioners that have not been subjected to standardized production or detoxification technologies and that contain raw materials or waste materials with food safety risks and/or soil ecological environmental risks.
