What this standard covers

This standard specifies the terms and definitions of the beer glass bottle filling production line, the composition of the production line, the selection of the production capacity of each production line, the working conditions, requirements, test methods, inspection rules and signs, packaging, transportation, and storage of the production line. This standard applies to beer filling production lines that use glass bottles as packaging containers (hereinafter referred to as "production lines"). This standard does not apply to draft beer aseptic filling production lines.

Document data

International classification (ICS): 67.260.
