What this standard covers

This standard specifies the requirements for raw and auxiliary materials, sensory requirements, physicochemical indicators, and net content of canned tropical and subtropical fruits. It describes the corresponding test methods, specifies inspection rules, and outlines the labeling, marking, packaging, transportation, and storage procedures. It also provides product classifications and codes for ease of technical specification. This standard applies to the production, inspection, and sale of canned longan, canned bayberry, canned coconut jelly (coconut fiber canned fruit), canned lychee, and canned rambutan. This standard does not apply to canned pineapple and canned citrus fruits.
