What this standard covers

This standard specifies the product specifications, graduation value, line length of the minimum graduation value, line width and width difference, graduation value deviation, flatness deviation, scale line firmness, and migration elements of the plotter ruler and protractor. The requirements for limit, edge, tip and appearance quality describe the corresponding test methods, stipulate inspection rules, marking, packaging, transportation and storage contents, and give product classifications to facilitate technical regulations. This standard applies to the design, production, inspection and sales of rigid synthetic resin protractors and metal protractors.

Document data

International classification (ICS): 01.100.40.

Chinese classification (CCS): Y50.

Estimated length of the Chinese original: 9,973 words.
